Work experience

March 2021 – to date (5 years)

About me

A web developer with five years of experience, mainly specializing in the development of high-load applications. I also have experience in the design of distributed systems.

I'm looking for a Senior Frontend/Fullstack developer position on a complex project (not landing pages or personal accounts)

Proofix

November, 2024 – currently working

Fullstack Developer

I'm developing an analog of Google Meet.

- I discovered and increased application performance by 1.4 times due to profiling;
- Revealed and reduced the number of heavy recalculations and redraws;
- Analyzed other similar applications, suggested redesigning the logic of the application for 1 room = 1 server, the company saved 1.37 times monthly server costs;
- Designed and developed AI agents (voice, text) to help hire employees and evaluate their responses;
- I found the problem, suggested and developed AI agent for analyzing human facial expressions;
- Analyzed the competitors and made a Document Picture in Picture (DPIP) for better UX;
- There were no tests, I decided to set up the environment and covered application with Unit and E2E tests with 87% for safe scaling and refactoring;
- Logging for the backend and frontend (ElasticSearch, DataDog);
- Worked with WebSocket and WebRTC;

Stack: NextJS, Livekit, WebWorker, Framer-motion, Playwright, React Testing Library, RTK, i18next, NodeJS, Axios, Redis

Divergent

September, 2022 – October, 2024

Fullstack Developer

- Created a service for onboarding an employee to a company;
- Created a reusable authorization service through providers (Google, GitHub, VK);
- Developed a backend for a chatbot using OpenAI: API, Database, Controllers, Services;
- Charts for analytics (using Recharts). All queries were implemented via RTK query with caching; ▪ UI Kit

Stack: NextJS, Redux-toolkit, react-hook-form, zod, React-select, Datepicker, SASS, Swagger, FSD, NestJS, axios, Strapi, Prisma, PostgreSQL

CDS SPB

March, 2021 – September, 2022

Front-end Developer

- Service for creating surveys;
- Chat for the support service;
- A constructor for creating documents/reports;

Stack: React, axios, react-hook-form, zod, react-dnd, Docker

Bachelor: Computer Science

- Programming in C, C++, Python;
- Data bases (OLAP, SQL etc);
- Forecasting results;
- Information Security; ▪ Higher Mathematics;
